

Consensual v Non-consensual Porn

Thought this to be an interesting article on how one woman, Emma Holten, decided to reclaim control from those who would attempt to erode her self-worth both as a woman and as a human being.

Not sure of her methods, and maybe this is playing right into the hands of those (men) who suggest that women should be ignored unless they get their kit off first. On the other hand, she does make a very impassioned argument regarding the ordeal she was subjected to, and perhaps on occasions it's better to convey the message on somebody else's terms than not be able to convey it at all.
